BSN Continual Enrollment Program (BSN-CEP)

Students participating in the BSN-Continual Enrollment Program are committing to continue their educational journey toward completing the BSN. While in the associate degree program, you can take general education and BSN-specific courses (CHE 100, SOC 361, and BA 300, 375, or 400). For students in the BSN-CEP, we understand that financial planning is a crucial part of your educational journey. You'll consult with your financial aid counselor in your ADN/AASN's third and fourth semesters to determine the best financial path for you to continue in the BSN-CEP. Once a path is chosen, you'll be guided through the steps toward the BSN core nursing coursework. Upon completing the associate degree and successfully completing the NCLEX-RN, you can continue to the BSN core courses.

The following financial paths include:

Path A: This path is for students who will continue living on campus during the BSN-CEP, receive an Academic Scholarship that will continue through the BSN, and/or are on an athletic scholarship.

Path B: This path is for students who do not live on campus, have utilized all their scholarship monies, and are not on athletic scholarships.

The details of each path will be discussed with students during orientation before each semester and one-on-one during the ADN/AASN's third and/or fourth semesters.

For students choosing Path B during the fourth semester of the ADN/AASN, the following steps must be completed before April 15 for Spring graduates and October 15 for Fall graduates.

1. Notify the RN to BSN Program Coordinator of their choice of Path B.
2. During the fourth semester:
    2.1. Submit a change of major form during advising with their BSN Advisor
    2.2. Submit Intent to Graduate form to student records
    2.3. Re-enroll with Campbellsville University as a CU Online student.

All BSN-CEP Students, at the completion of ADN/AASN:
1. Schedule the NCLEX exam as soon as possible after being "cleared for testing."
2. Attend RN to BSN Bootcamp Orientation and complete the RN to BSN Bootcamp course in Moodle before the first day of BSN courses.
